REAP™ ~ Renewable Energy Agricultural Processing

User friendly, efficient technology for your plant

Rely on your software system to run your business and realize efficiencies. Compatible with Microsoft Dynamics® technology, REAP™ is a comprehensive commodity procurement and business management software solution.

REAP will help you manage ~

- Commodity procurement
- Investors
- Construction and expansion projects
- Inventory
- Business intelligence
- Accounting
- Finance
- Preventative maintenance
- Lab information

Automate and streamline your business processes with fully integrated technology

“With REAP we only have to enter data into our system once. No more **tedious, multiple entries**. We’ve reduced our error rate to nearly **zero**, sped up our processes and made our customers very happy.”

~ Jeff Robertson, CEO
United Wisconsin Grain Producers (UWGP)

REAP core solution functionality

Core solution functionality for REAP includes Scheduled Deliveries, Data Importer, Contract Management, Integrated Inventory, Purchase and Sales Settlements, Business Intelligence, Reporting and Analysis and Product Receipts and Shipments.

REAP additional modules

Additional functionality for REAP includes Automated Delivery, Inventory I/O Control, Construction Management, Investor Relationship Manager and Lab Information Management System.

Learn how to reduce your plant’s operating costs

Request a complimentary REAP information package to discover the tangible business benefits gained from modern, integrated technology. **Call** (888) 898-4330 ext. 314 or **email** reap@encorebusiness.com.
