ENCORE BUSINESS SOLUTIONS EARNS CERTIFIED FOR MICROSOFT DYNAMICS® ACCREDITATION

WINNIPEG, MANITOBA, CANADA – July 10, 2009, Encore Business Solutions announced today that its Advanced SmartList product is now Certified for Microsoft Dynamics GP. This signifies that the solution has met Microsoft Corp.'s highest standard for partner-developed software. Solutions that are Certified for Microsoft Dynamics have demonstrated high development quality and compatibility with the Microsoft Dynamics product on which it runs by passing rigorous testing by Lionbridge, a third party test firm. In addition, the product must have customers using the solution who are willing to recommend it.

Advanced SmartList is a seamless extension to SmartList, a Microsoft Dynamics GP query tool. Launched in 2005 and currently Encore's best selling product, Advanced SmartList adds Excel like functionality to SmartList allowing users to sum, sort, filter and re-order columns right in the query. It also enables the creation of live custom reports and speeds up the download into Excel allowing users to be more effective, and save time and effort.

"Achieving the Certified for Microsoft Dynamics GP designation for Advanced SmartList reinforces Encore's ongoing commitment to developing quality products for Microsoft Dynamics and our leadership in the development community," states Brent Twist, CEO, Encore Business Solutions. "We pride ourselves in delivering innovative software solutions to our customers. The Certified for Microsoft Dynamics achievement is representative of this and gives both reselling partners and end users additional confidence in the stability of our products."
