Encore Business Solutions Ranks On the List of Top 15 Most Useful Add-Ons For Microsoft Dynamics GP

WINNIPEG, MB, Canada — December 13, 2011 —Encore Business Solutions (Encore) today announced that their Project Tracking with Advanced Analytics solution has been awarded a place on the DynamicsWorld 2012 list of top 15 most useful add-ons for Dynamics GP.

The Project Tracking series of solutions from Encore has been in the market for 12 years and has 1000's of current users today around the world. The series consists of its core solution, Project Tracking with Advanced Analytics and has optional modules for budgeting and importing. Project Tracking with Advanced Analytics is a flexible and easy to setup project tracking solution that is so flexible that it can be customized to most any business. Some companies use it to track expenses only while others use it to track sales and cash receipts for sales analysis and commissions reporting.

The seamless integration with Dynamics GP leverages existing setup and workflow which results in an easy-to-use and easy-to-maintain connection between company financials and project activities. Project Tracking with Advanced Analytics integrates with all the core modules of Dynamics GP and users benefit from the short learning curve especially if they are an existing GP user and familiar with GP's transaction entry windows.

"We take pride in delivering quality, user friendly and scalable products to our clients," states Sherry (Sam) Bettencourt, Manager of Business Development. "It's an honor to have Project Tracking with Advanced Analytics make the top 15 list knowing that there's hundreds of ISV's who develop add-ons for Dynamics GP. A large part of our success can be attributed to the outstanding partners who have been selling and promoting our solutions for 20 years."

This year there were over 500 product nominations. The selection process was based on a number of requirements, such as: value for money, ease of implementation, product support, the increase in effectiveness due to use of the add-on, simplicity of integration, add-on functionality and number of installations. This is the second time that an Encore product has been ranked on the list of top most useful add-on products for Dynamics GP. Encore's Advanced SmartList was awarded a place on the list in 2010.

About Encore Business Solutions

Encore Business Solutions has been committed to helping organizations drive business efficiency with innovative and modern business management solutions since 1990. As a Microsoft authorized

Independent Software Vendor (ISV), Encore has helped organizations worldwide enhance business value and improve bottom lines.
