

+ PayCode Mass Update for Canadian Payroll

Simplify the payroll process by saving time and effort with this easy add-on

PayCode Mass Update for Canadian Payroll allows users to update a large number of paycodes for multiple employees at once, through one easy-to-use window in Microsoft Dynamics GP. Its setup is quick and easy and this add-on is simple for payroll staff to use.

Easy to Setup, Easy to Use & A Great Time Saver

PayCode Mass Update for Canadian Payroll is a huge timesaver! Not only is it easy for payroll staff to use, it simplifies the process of updating paycodes by offering:

- The ability to make mass updates of paycode rates and their associated dependent paycodes per employee
- Mass updates of vacation pay percentages per employee
- The ability to filter your range for updates by employees, position, employee class and department
- The user the flexibility to enter only the amounts that they wish to change and replace the rest with either a standard amount or the current rate
- The option to preview all paycodes assigned to the employee that are linked to the master paycode

Benefits

- Eliminate time consuming manual and tedious paycode and vacation percentage updates
- Manage large volumes of payroll data
- Quick to install and instantly ready to use with little setup
