

Analyze your project profitability with a powerful tracking system

Project Tracking with Advanced Analytics creates a seamless connection between a company's financial transactions and project revenue and expenses. With this product you can quickly and easily assign project information from within Microsoft Dynamics GP® at the time of transaction entry. Project Tracking with Advanced Analytics is an easy-to-setup project tracking solution that is so flexible it can be customized to most businesses and is a great alternative to both GP's Project Accounting and Analytical Accounting.

Flexible and Easy-to-Use

- Install, configure and learn how to use Project Tracking in as little as 3 days.
- You decide what you want to capture and report on in your business – once you know that, the rest is easy!
- Track project revenue and expenses across fiscal years.
- You can even tag project information to an already posted transaction.

Improve and Control Data Integrity

- Restrict access to any user or project separately.
- Close one or many projects at a single time.
- Auto generate project numbering for audit purposes.
- Manage multiple projects.
- Create or revise budgets to monitor performance and control your project activities.

Powerful Analysis

- Group, filter and sort data with a simple drag and drop feature.
- Calculate data with sum, min and max functionality.
- Generate a variety of pre-configured ad hoc reports and save for future use.
- Analyze one or multiple projects at a single time.

Benefits

- Maintain a streamlined Chart of Accounts by providing the ability to track project information outside of the Chart of Accounts
- Integrates with all the core modules of Dynamics GP
- Tracks budget versus actual and reports on variances
- Quickly assign a transaction to one or more projects from within GP at the time of transaction entry
- Quick to implement with a short learning curve
- Generates ad hoc queries and reports on the fly utilizing the built in functionality of Advanced Analytics

+ Extend Project Tracking with these recommended add-ons

Project Tracking Budgeting

- Revise and massage budgets for projects in countless ways.
- Compare budget to actual, thereby providing variance reporting.

Project Tracking Importer

- Import project master, project adjustments with GL entries, project adjustments without GL and project budget details.

Assign and apply up to 7 transaction user-defined fields to your projects.

Define breakdown codes for each distribution amount type.

The user-friendly inquiry tool provides the ability to create and run custom ad hoc queries.
