Microsoft Dynamics 365 Finance and Supply Chain Management, Developer Onboarding

Advanced Topics

Our Advanced Developer Onboarding training provides a detailed walkthrough of the advanced topics of the onboarding process in Microsoft Dynamics 365 for Finance and Supply Chain Management for developers. The assumption is that the developer already has a good understanding of the basics. The aim of this training is to deep dive into the "hardcore" development subjects. This training leaves the developer with a good understanding of the all over concepts and advanced techniques of development in Dynamics 365 Finance and Supply Chain Management.

During this training we will cover Metadata related details and metadata search. We will talk about Extensibility Framework and concepts (including table, form, and menu extensions). We will also cover model management, deployable package creations, development lifecycle, release processes concepts, integrations and resolving issues.

Contact us now to schedule your training!
